

PRODUCT INFORMATION

Clone ID	1A8
Target	CALR
Synonyms	cC1qR;CRT;HEL-S-99n;RO;SSA
Host Species	Rabbit
Description	Anti-CALR antibody(1A8), Rabbit mAb
Delivery	In Stock
Uniprot ID	P27797
IgG type	Rabbit mAb
Clonality	Monoclonal
Reactivity	Human
Applications	ELISA
Recommended Dilutions	ELISA 1/5000-10000
Purification	Purified from cell culture supernatant by affinity chromatography
Formulation & Reconstitution	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
Storage & Shipping	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
Background	Calreticulin is a highly conserved chaperone protein which resides primarily in the endoplasmic reticulum, and is involved in a variety of cellular processes, among them, cell adhesion. Additionally, it functions in protein folding quality control and calcium homeostasis. Calreticulin is also found in the nucleus, suggesting that it may have a role in transcription regulation. Systemic lupus erythematosus is associated with increased autoantibody titers against calreticulin. Recurrent mutations in calreticulin have been linked to various neoplasms, including the myeloproliferative type.[provided by RefSeq, May 2020]
Usage	Research use only
Conjugate	Unconjugated

Figure 1. ELISA plate pre-coated by 1 µg/ml (100 µl/well) Human CALR Protein can bind Rabbit anti-CALR monoclonal antibody(clone: 1A8) in a linear range of 1-50 ng/ml.
