

## **PRODUCT INFORMATION**

Clone ID DM211 CD43 **Target** 

**Synonyms** CD43; GALGP; GPL115; LSN

**Host Species** Rabbit

Description Anti-CD43 antibody(DM211); Rabbit mAb

**Delivery** In Stock **Uniprot ID** P16150 IgG type Rabbit IgG Clonality Monoclonal Reactivity Human

**Applications** ELISA; Flow Cyt

Recommended

**Dilutions** 

ELISA 1:5000-10000; Flow Cyt 1:100

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Formulation & Reconstitution

Background

Storage & Shipping

Lyophilized from sterile PBS, pH 7.4. Normally 5 % 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a highly sialylated glycoprotein that functions in antigen-specific activation of T cells; and is found on the surface of thymocytes; T lymphocytes; monocytes; granulocytes; and some B lymphocytes. It contains a mucin-like extracellular domain; a transmembrane region and a carboxy-terminal intracellular region. The extracellular domain has a high proportion of serine and threonine

residues; allowing extensive O-glycosylation; and has one potential N-glycosylation site; while the

carboxy-terminal region has potential phosphorylation sites that may mediate transduction of activation signals. Different glycoforms of this protein have been described. In štimulated immunė cells; proteolytic cleavage of the extracellular domain occurs in some cell types; releasing a soluble extracellular fragment. Defects in expression of this gene are associated with Wiskott-Aldrich syndrome. [provided by

RefSeq; Sep 2017]

Usage Research use only Conjugate Unconjugated

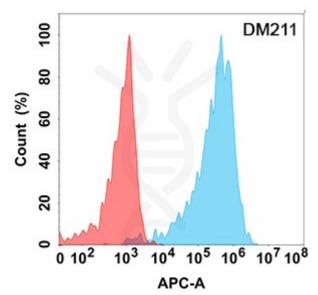

Figure 1. Flow cytometry analysis with Anti-CD43 (DM211) on HEK293 cells transfected with human CD43 (Blue histogram) or HEK293 transfected with irrelevant protein (Red histogram).

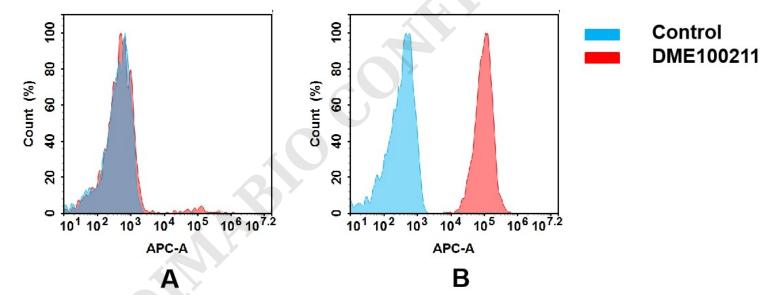

Figure 2. Flow cytometry analysis of antigen binding of rabbit anti-human CD43 mAb(DME100211). (A) DME100211 does not bind to CHO-S cells that do not express CD43. (B) A clear peak shift of DME100211 was seen compared to the control when incubated with CD43-expressing THP-1 cells, indicating strong binding of DME100211 to CD43. Antibodies were incubated at 5  $\mu$ g/mL.
