

## **PRODUCT INFORMATION**

Clone ID DMC436
Target CD83

Synonyms BL11; HB15
Host Species Rabbit

**Description** Anti-CD83 antibody(DMC436); IgG1 Chimeric mAb

Delivery In Stock Uniprot ID Q01151

IgG type Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal
Reactivity Human
Applications Flow Cyt

Recommended Dilutions

Flow Cyt 1:100

**Purification**Purified from cell culture supernatant by affinity

chromatography

Formulation & Reconstitution

Storage & Shipping

**DIMA Disclaimer** 

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

témperature.

The protein encoded by this gene is a single-pass type I membrane protein and member of the immunoglobulin superfamily of receptors. The encoded protein may be involved in the

**Background** regulation of antigen presentation. A soluble form of this protein can bind to dendritic cells and

inhibit their maturation. Three transcript variants encoding different isoforms have been found for

this gene.

**Usage** Research use only

**Conjugate** Unconjugated

All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are

actively scrutinizing all patent application to

ensure no IP infringement.

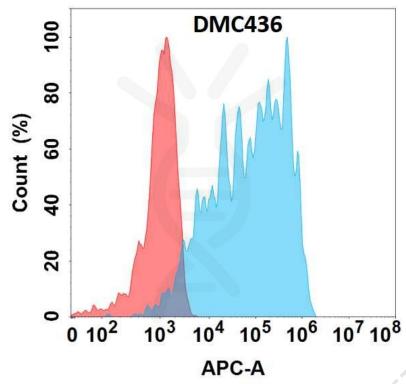

Figure 1. Flow cytometry analysis with Anti-CD83 (DMC436) on HEK293 cells transfected with human CD83 (Blue histogram) or HEK293 transfected with irrelevant protein (Red histogram).

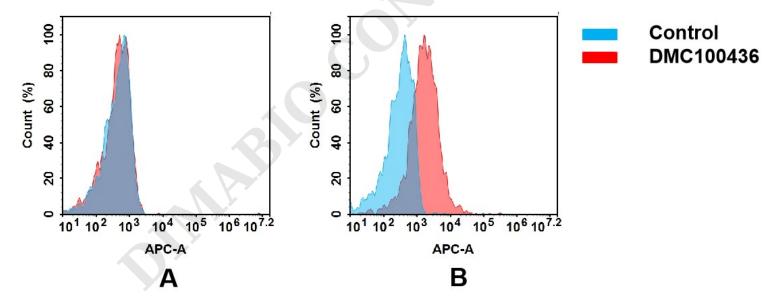

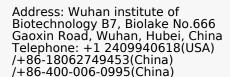

Figure 2. Flow cytometry analysis of antigen binding of anti-human CD83 mAb(DMC100436). (A) DMC100436 does not bind to CHO-S cells that do not express CD83. (B) A clear peak shift of DMC100436 was seen compared to the control when incubated with CD83-expressing Raji cells, indicating strong binding of DMC100436 to CD83. Antibodies were incubated at 5  $\mu$ g/mL.
