

PRODUCT INFORMATION

Clone ID **DMC472 Target** FPHA4

Synonyms EK8; HEK8; SEK; TYRO1

Host Species Rabbit

Anti-EPHA4 antibody(DMC472); IgG1 Chimeric Description

mAb **Delivery** In Stock **Uniprot ID** P54764

Rabbit/Human Fc chimeric IgG1 IgG type

Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended

Background

DIMA Disclaimer

Flow Cyt 1:100 **Dilutions**

Purified from cell culture supernatant by affinity **Purification**

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

témperature.

This gene belongs to the ephrin receptor subfamily of the protein-tyrosine kinase family. EPH and EPH-related receptors have been implicated in mediating developmental events; particularly in the nervous system. Receptors in the EPH subfamily typically have a single kinase domain and an extracellular region containing a Cys-rich domain and 2 formers are divided into 2 groups.

The ephrin receptors are divided into 2 groups based on the similarity of their extracellular domain sequences and their affinities for binding ephrin-A and ephrin-B ligands. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq; Jan

2015]

Usage Research use only Conjugate Unconjugated

> All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are

actively scrutinizing all patent application to ensure no IP infringement.

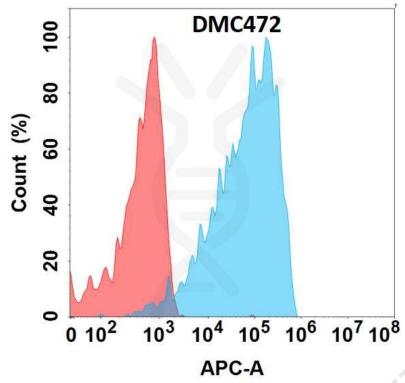

Figure 1. Flow cytometry analysis with Anti-EPHA4 (DMC472) on HEK293 cells transfected with human EPHA4 (Blue histogram) or HEK293 transfected with irrelevant protein (Red histogram).

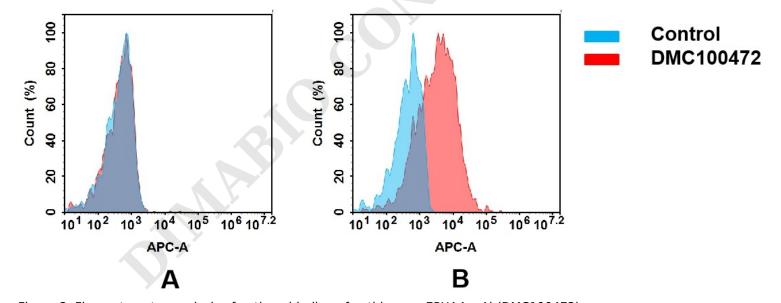

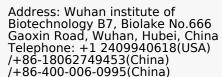

Figure 2. Flow cytometry analysis of antigen binding of anti-human EPHA4 mAb(DMC100472). (A) DMC100472 does not bind to CHO-S cells that do not express EPHA4. (B) A clear peak shift of DMC100472 was seen compared to the control when incubated with EPHA4-expressing MCF-7 cells, indicating strong binding of DMC100472 to EPHA4. Antibodies were incubated at 5 μ g/mL.
