Cat. No. DME100091

PRODUCT INFORMATION

Clone ID DM91 GPRC5D **Target** GPRC5D **Synonyms Host Species** Rabbit

Description Anti-GPRC5D antibody(DM91); Rabbit mAb

Delivery In Stock **Uniprot ID** Q9NZD1 IgG type Rabbit IgG Clonality Monoclonal Reactivity Human **Applications** ELISA FC

Recommended **Dilutions**

ELISA 1:5000-10000; Flow Cyt 1:100

Purified from cell culture supernatant by affinity **Purification**

chromatography

Formulation & Reconstitution

DIMA Disclaimer

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is a member of the G protein-coupled receptor family; however; **Background**

the specific function of this gene has not yet been

determined.

Usage Research use only

Conjugate Unconjugated

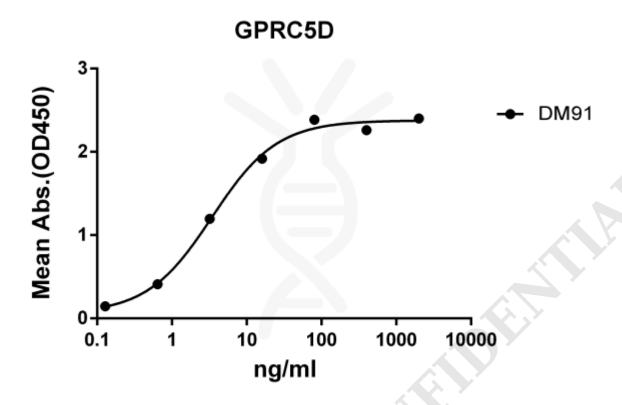

Figure 1. ELISA plate pre-coated by 2 μg/ml (100 μl/well) Human GPRC5D protein, hFc-His tagged protein ([getskuurl sku="PME100066"]) can bind Rabbit anti-GPRC5D monoclonal antibody **(clone: DM91)** in a linear range of 0.256-32 ng/ml.

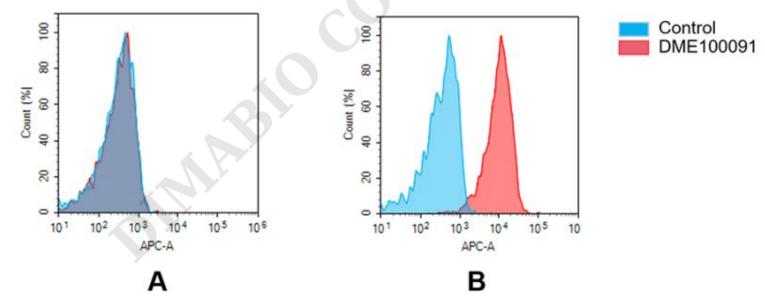

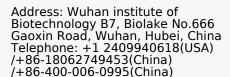

Figure 2 . Flow cytometry analysis of antigen binding of rabbit anti-human GPRC5D mAb (DME100091). (A) DME100091 does not bind to Jurkat cells that do not express GPRC5D. (B) A clear peak shift of DME100091 was seen compared to the control when incubated with GPRC5D-expressing MM.1S cells, indicating strong binding of DME100091 to GPRC5D. Antibodies were incubated at 5 μ g/mL.
