

PRODUCT INFORMATION

|                              |   |
|------------------------------|---|
| Common Name                  | 5F9,MLN2045   |
| Conjugate                    | Unconjugated  |
| Synonyms                     | DIAR6;GC-C;GUC2C;MECIL;MUCIL;STAR   |
| Applications                 | ELISA; Flow Cyt   |
| Recommended Dilutions        | ELISA 1:5000-10000; Flow Cyt 1:100  |
| Formulation & Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.  |
| Host Species                 | Homo sapiens  |
| IgG type                     | Human IgG1 - kappa  |
| Reactivity                   | Human   |
| Target                       | GUCY2C  |
| Uniprot ID                   | P25092  |
| Description                  | Anti-GUCY2C(indusatumab biosimilar) mAb   |
| Delivery                     | In Stock  |
| Storage&Shipping             | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature. |
| Background                   | Research grade biosimilar. Not for use in therapeutic or diagnostic procedures for humans or animals.   |
| Usage                        | Research use only   |

**Anti-GUCY2C (indusatumab biosimilar) mAb ELISA**  
0.1 µg of Human GUCY2C, His tagged protein per well

Figure 1. ELISA plate pre-coated by 1 µg/mL (100 µL/well) Human GUCY2C protein, His Tag PME100262 can bind Anti-GUCY2C Neutralizing antibody (BME100067) in a linear range of 3.2-400 ng/mL.

Figure 2. Flow cytometry analysis with Anti-GUCY2C(indusatumab biosimilar) mAb 1 µg/mL on HEK293 cells transfected with Human GUCY2C (Blue histogram) or HEK293 transfected with irrelevant protein (Red histogram).

Figure 3. Flow cytometry analysis of antigen binding of anti-human GUCY2C mAb(BME100067).  
(A) BME100067 does not bind to 293T cells that do not express GUCY2C.  
(B) A clear peak shift of BME100067 was seen compared to the control when incubated with GUCY2C-expressing HT55 cells, indicating strong binding of BME100067 to GUCY2C. Antibodies were incubated at 2 µg/mL.
