

## PRODUCT INFORMATION

|                             |  |
|-----------------------------|--|
| <b>Target</b>               | BTN3A2, CCR1, CD138, CD147, CD164, CD38, CXCR3, GPRC5D, KI67, LGALS1, SELPLG   |
| <b>Description</b>          | The embedded and sliced tumor sections (4µm section) from Balb/C nu mice implanted with MM.1S cells  |
| <b>Host Cells</b>           | MM.1S  |
| <b>Applications</b>         | IHC  |
| <b>Host mice</b>            | Balb/C nu  |
| <b>Delivery</b>             | 1 week   |
| <b>Guarantee</b>            | 36 months from the date of manufacture   |
| <b>Background</b>           | These carefully prepared tissue slides offer researchers standardized and high-quality samples for antibody testing. Utilizing tumor models derived from immunocompromised mice, researchers can confidently assess antibody specificity and sensitivity, driving advancements in cancer diagnostics and therapeutics. |
| <b>Storage&amp;Shipping</b> | Room temperature   |
| <b>Usage</b>                | Research use only  |

**SLI100002**

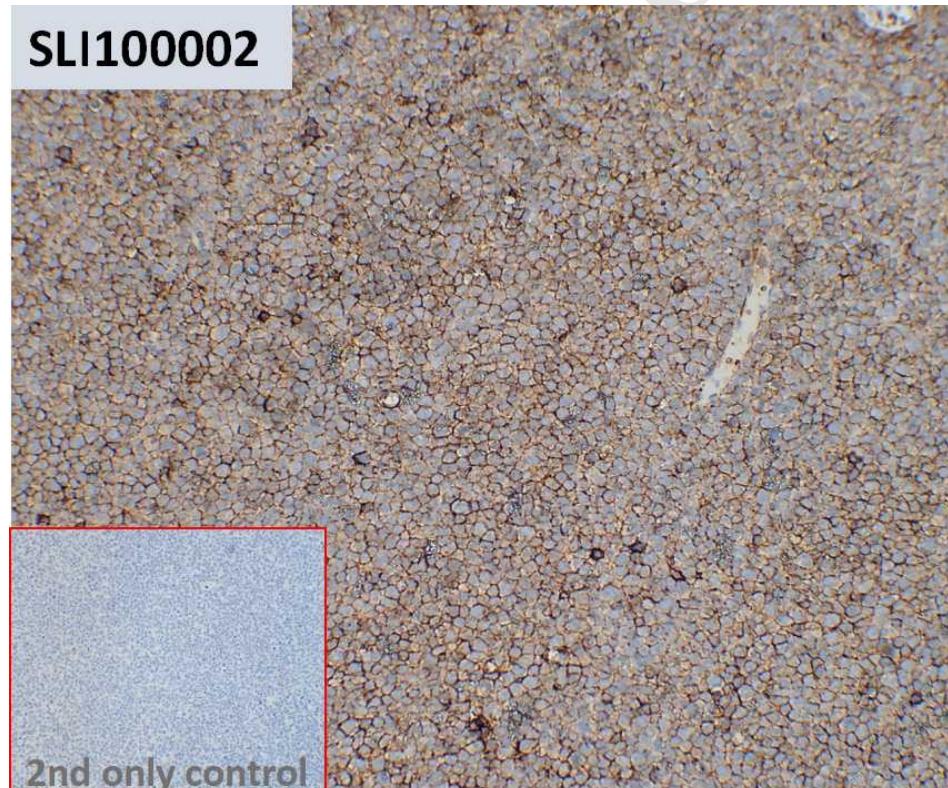

Figure 1. IHC analysis of Balb/C nu MM.1S DiSliceX™ SlideSet section (Cat. No. SLI100002) with Anti-SELPLG antibody(68H10), IgG1 Chimeric mAb (Cat. No. DMC100741) at a concentration of 10 µg/ml. The inset image shows the absence of staining in the secondary antibody-only control.
