

## **PRODUCT INFORMATION**

Clone ID DMC213 CD24 **Target** CD24A **Synonyms** Rabbit **Host Species** 

Biotinylated Anti-CD24 antibody(DMC213); IgG1 Description

Chimeric mAb

**Delivery** 2-3 weeks **Uniprot ID** P25063

Rabbit/Human Fc chimeric IgG1 IgG type

Clonality Monoclonal Reactivity Human

**Applications** ELISA; Flow Cyt; WB; IHC

ELISA 1:5000-10000; Flow Cyt 1:100; WB 1:1000; Recommended

**Dilutions** IHC 1:100

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a sialoglycoprotein that is expressed on mature granulocytes and B cells and modulates growth and differentiation signals to these cells. The precursor protein is cleaved to a short 32 amino acid mature peptide which is anchored via a glycosyl phosphatidylinositol (GPI) link to the cell surface. This gene was missing from previous genome assemblies; but is properly

located on chromosome 6. Non-transcribed pseudogenes have been designated on chromosomes 1; 15; 20; and Y. Alternative

splicing results in multiple transcript variants.

Usage Research use only

Conjugate Biotinylated

**Background** 

All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under
