Cat. No. DME101021B

## **PRODUCT INFORMATION**

Clone ID 1H6
Target CL2A
Synonyms N.A.
Host Species Rabbit

**Description**Biotinylated Anti-CL2A(ADC linker) antibody(1H6);
Babbit mAb

Rabbit mAb

**Delivery** 2-3 weeks

Uniprot ID N.A.

IgG type Rabbit IgG
Clonality Monoclonal

**Reactivity** N.A. **Applications** ELISA

Recommended Dilutions

**Background** 

**DIMA Disclaimer** 

ELISA 1:5000-10000

**Purification**Purified from cell culture supernatant by affinity

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

Storage & Shipping intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

CL2A is a crucial component in antibody-drug conjugate (ADC) therapy, acting as a chemical linker that connects a potent DNA topoisomerase I inhibitor, SN-38, to an antibody. Representing Cysteine-Linked 2-Aminoethyl, CL2A features a complex structure with a PEG8 chain, a triazole ring, a PABC-peptide, and a maleimide group. The maleimide group binds to a cysteine residue on the antibody, facilitating targeted drug delivery.

the antibody, facilitating targeted drug delivery. Designed to release SN-38 in acidic cancer cell environments, CL2A induces DNA damage and cell death. This versatile linker is employed in ADCs targeting various antigens like Trop-2 or

HER2, tailored to specific cancer types.

**Usage** Research use only

**Conjugate** Biotinylated

All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or
