

## **PRODUCT INFORMATION**

Clone ID 1E11 **SPARC Target** 

**Synonyms** BM-40;Osteonectin;ON

**Host Species** 

Biotinylated Anti-SPARC antibody(1E11), IgG1 Description

Chimeric mAb

**Delivery** 2-3 weeks **Uniprot ID** P09486

Rabbit/Human Fc chimeric IgG1 IgG type

Clonality Monoclonal Reactivity Human **Applications ELISA** 

Recommended

ELISA 1/5000-10000 **Dilutions** 

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

témperature.

This gene encodes a cysteine-rich acidic matrix-associated protein. The encoded protein is required for the collagen in bone to become calcified but is also involved in extracellular matrix synthesis and promotion of changes to cell shape. The gene product has been associated

**Background** with tumor suppression but has also been correlated with metastasis based on changes to cell shape which can promote tumor cell invasion.

Three transcript variants encoding different isoforms have been found for this gene. [provided

by RefSeq, Jun 2015]

Usage Research use only

Conjugate Biotinylated

> All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under

patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are **DIMA Disclaimer** actively scrutinizing all patent application to

ensure no IP infringement.
