

**PRODUCT INFORMATION**

<b>Target</b>	Canine_PD1
<b>Description</b>	Monoclonal Cell Line Derived from 293T Cells, Engineered for Stable Expression of canine PD1 Using Lentiviral Technology
<b>Host Cells</b>	293T
<b>Uniprot ID</b>	NP_001301026.1
<b>Applications</b>	FACS Data
<b>Growth media</b>	DMEM+10% FBS+1% P.S+Gln+2 ug/mL Puromycin
<b>Package</b>	5E6 Cells/mL
<b>Suggested Control</b>	SKU: BME100202
<b>Warranty and Disclaimer</b>	1. Please inspect cells upon receipt and report any issues promptly. 2. We offer one-time replacements for issues reported within a week of receipt. 3. User-induced issues are not eligible for free replacements. 4. We do not accept liability for damages resulting from cell use, storage, or loss. 5. Feedback received more than one month after receipt will not be processed.
<b>Storage&amp;Shipping</b>	Cells are shipped using dry ice and require liquid nitrogen storage for long term preservation.
<b>Synonyms</b>	CD279, PD-1, PD1, SLEB2, hPD-1, hPD-I, hsLE1
<b>Background</b>	Programmed cell death protein 1 (PDCD1) is an immune-inhibitory receptor expressed in activated T cells; it is involved in the regulation of T-cell functions, including those of effector CD8+ T cells. In addition, this protein can also promote the differentiation of CD4+ T cells into T regulatory cells. PDCD1 is expressed in many types of tumors including melanomas, and has demonstrated to play a role in anti-tumor immunity. Moreover, this protein has been shown to be involved in safeguarding against autoimmunity, however, it can also contribute to the inhibition of effective anti-tumor and anti-microbial immunity. [provided by RefSeq, Aug 2020]
<b>Usage</b>	For research use only.

## Canine\_PD1 293T Cell Line

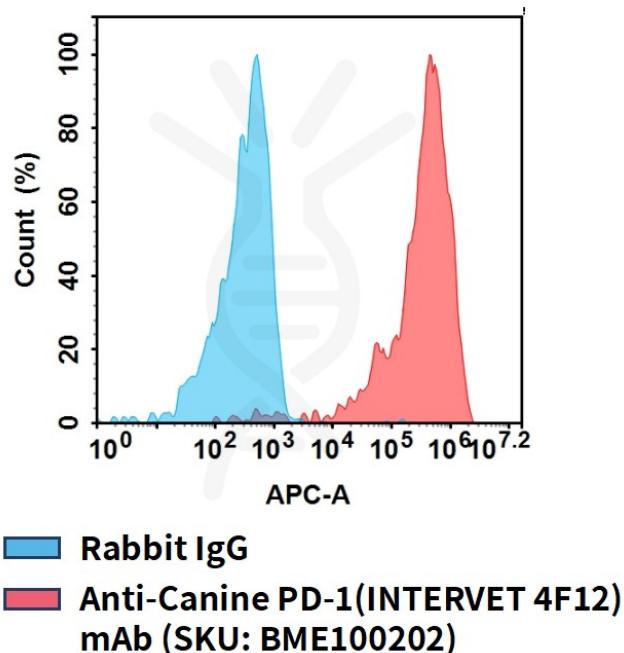

Figure 1. Flow cytometry analysis of Canine\_PD1 overexpression using Canine\_PD1 293T Cell Line (Cat. No. CEL100104) and Anti-Canine PD-1(INTERVET 4F12) mAb (Cat. No. BME100202)
