

PRODUCT INFORMATION

GPC3 **Target**

SGB; DGSX; MXR7; SDYS; SGBS; OCI-5; SGBS1; **Synonyms**

GTR2-2

Recombinant Cynomolgus GPC3(24-552) protein **Description**

with C-terminal 10×His tag

Delivery In Stock A0A2K5VK50 **Uniprot ID Expression Host** HFK293

Tag C-10×His tag

Molecular

Purity

Background

GPC3(Gln24-His552) 10×His tag Characterization

The protein has a predicted molecular mass of **Molecular Weight** 61.6 kDa after removal of the signal peptide.

The purity of the protein is greater than 80% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

Cell surface heparan sulfate proteoglycans are composed of a membrane-associated protein core substituted with a variable number of heparan sulfate chains. Members of the glypican-related integral membrane proteoglycan family (GRIPS)

contain a core protein anchored to the cytoplasmic membrane via a glycosyl phosphatidylinositol linkage. These proteins may

play a role in the control of cell division and growth regulation. The protein encoded by this gene can bind to and inhibit the dipeptidyl peptidase activity of CD26, and it can induce apoptosis in certain cell types. Deletion mutations in this gene are associated with Simpson-Golabi-

Behmel syndrome, also known as Simpson dysmorphia syndrome. Alternative splicing results in multiple transcript variants. [provided by

RefSeq, Sep 2009]

Usage Research use only Conjugate Unconjugated

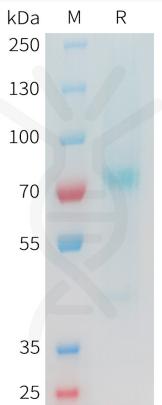

Figure 1. Cynomolgus GPC3(24-552) Protein, His Tag on SDS-PAGE under reducing condition.
