

PRODUCT INFORMATION

Target Her2

NEU; NGL; ERBB2; TKR1; CD340; HER-2; VSCN2; **Synonyms** MLN 19; MLN-19; c-ERB2; c-ERB-2; HER-2/neu;

p185(erbB2)

Recombinant Cynomolgus Her2 protein with C-**Description**

terminal 10×His tag

Delivery In Stock

Uniprot ID XP_005584091.3

HEK293 Expression Host

Tag C-10×His tag

Molecular

Reconstitution

Background

Purity

Her2(Thr120-Thr749) 10×His tag Characterization

The protein has a predicted molecular mass of 70.7 kDa after removal of the signal peptide. The **Molecular Weight**

apparent molecular mass of cHer2-His is approximately 70-130 kDa due to glycosylation.

The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before Formulation &

lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

témperature.

This gene encodes a member of the epidermal growth factor (EGF) receptor family of receptor tyrosine kinases. This protein has no ligand binding domain of its own and therefore cannot bind growth factors. However, it does bind tightly to other ligand-bound EGF receptor family

members to form a heterodimer, stabilizing ligand binding and enhancing kinase-mediated

activation of downstream signalling pathways, such as those involving mitogen-activated protein kinase and phosphatidylinositol-3 kinase. Allelic variations at amino acid positions 654 and 655 of isoform a (positions 624 and 625 of isoform b)

have been reported, with the most common allele, Ile654/Ile655, shown here. Amplification and/or overexpression of this gene has been reported in numerous cancers, including breast and ovarian tumors. Alternative splicing results in several additional transcript variants, some encoding different isoforms and others that have not been fully characterized. [provided by RefSeq,
