Background

PRODUCT INFORMATION

CDH3 **Target**

Monoclonal Cell Line Derived from CHO-S Cells Description Engineered for Stable Expression of Human CDH3

Using Lentiviral Technology

Host Cells CHO-S **Uniprot ID** P22223 **Applications** FACS Data

DMEM+10% FBS+1% P.S+Gln+2 ug/mL **Growth media**

Puromycin **Package** 5E6 Cells/mL

Suggested Control SKU: DMC101041

1. Please inspect cells upon receipt and report any issues promptly. 2. We offer one-time

replacements for issues reported within a week of receipt. 3. User-induced issues are not eligible for free replacements. 4. We do not accept liability for damages resulting from cell use, storage, or loss. 5. Feedback received more than one month

after receipt will not be processed.

Cells are shipped using dry ice and require liquid Storage & Shipping nitrogen storage for long term preservation.

Synonyms CDHP;HJMD;PCAD

> This gene encodes a classical cadherin of the cadherin superfamily. Alternative splicing results

in multiple transcript variants, at least one of which encodes a preproprotein that is proteolytically processed to generate the mature glycoprotein. This calcium-dependent cell-cell adhesion protein is comprised of five extracellular cadherin repeats, a transmembrane region and a highly conserved cytoplasmic tail. This gene is located in a gene cluster in a region on the long arm of chromosome 16 that is involved in loss of

heterozygosity events in breast and prostate cancer. In addition, aberrant expression of this protein is observed in cervical adenocarcinomas. Mutations in this gene are associated with

hypotrichosis with juvenile macular dystrophy and ectodermal dysplasia, ectrodactyly, and macular

dystrophy syndrome (EEMS).

For research use only. Usage
