Background

PRODUCT INFORMATION

TIGIT Target

Monoclonal Cell Line Derived from K562 Cells Description Engineered for Stable Expression of Human TIGIT

Using Lentiviral Technology

Host Cells K562 **Uniprot ID** Q495A1 **Applications FACS Data**

RPMI-1640+10% FBS+1% P.S+1% Gln+2 ug/mL **Growth media**

Puromycin 5E6 Cells/mL

Suggested Control SKU: BME100024

1. Please inspect cells upon receipt and report any issues promptly. 2. We offer one-time

replacements for issues reported within a week of

Warranty and receipt. 3. User-induced issues are not eligible for Disclaimer free replacements. 4. We do not accept liability for damages resulting from cell use, storage, or loss. 5. Feedback received more than one month

after receipt will not be processed.

Cells are shipped using dry ice and require liquid Storage & Shipping nitrogen storage for long term preservation.

TIGIT; VSIG9; VSTM3 Synonyms

> This gene encodes a member of the PVR (poliovirus receptor) family of immunoglobin proteins. The product of this gene is expressed on several classes of T cells including follicular B helper T cells (TFH). The protein has been shown to bind PVR with high affinity; this binding is

thought to assist interactions between TFH and dendritic cells to regulate T cell dependent B cell
