

## **PRODUCT INFORMATION**

**Target** AVPR1A

**Synonyms** V1aR; AVPR1; AVPR V1a

Recombinant human AVPR1A Protein with C-**Description** 

terminal human Fc tag

**Delivery** In Stock **Uniprot ID** P37288 **Expression Host HEK293** 

Tag C-Human Fc tag

Molecular

**Purity** 

**Background** 

AVPR1A(Met1-Lys52) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of **Molecular Weight** 31.5 kDa after removal of the signal peptide.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before Formulation &

lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene acts as receptor for arginine vasopressin. This receptor belongs to the subfamily of G-protein coupled receptors which includes AVPR1B, V2R and OXT receptors. Its activity is mediated by G proteins which the substantial of the substantial stimulate a phosphatidylinositol-calcium second messenger system. The receptor mediates cell

contraction and proliferation, platelet aggregation, release of coagulation factor and

glycogenolysis. [provided by RefSeq, Jul 2008]

**Usage** Research use only

Conjugate Unconjugated
