

PRODUCT INFORMATION

Target B7-H7

Synonyms B7y; B7H7; B7-H5; HHLA2

Recombinant human B7-H7(23-137) Protein with **Description**

C-terminal human Fc tag

Delivery In Stock **Uniprot ID** Q9UM44 **Expression Host HEK293**

Tag C-Human Fc tag

Molecular

Background

B7-H7(Ile23-Lys137) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of **Molecular Weight**

39.5 kDa after removal of the signal peptide. The apparent molecular mass of B7-H7(23-137)-hFc is approximately 35-55 kDa due to glycosylation. The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a protein ligand found on the surface of monocytes. The encoded protein is thought to regulate cell-mediated immunity by binding to a receptor on T lymphocytes and

inhibiting the proliferation of these cells. Alternate splicing results in multiple transcript variants.
