

PRODUCT INFORMATION

Tag C-Flag Tag CACNG1 **Target CACNLG Synonyms**

Human CACNG1 full length protein-synthetic **Description**

nanodisc **Delivery** In Stock **Uniprot ID** Q06432 **Expression Host HEK293**

Druggable Genome, Ion Channels: Other, **Protein Families**

Transmembrane

Arrhythmogenic right ventricular cardiomyopathy (ARVC), Cardiac muscle contraction, Dilated **Protein Pathways**

cardiomyopathy, Hypertrophic cardiomyopathy (HCM), MAPK signaling pathway

The human full length CACNG1 protein has a MW **Molecular Weight**

of 25.0 kDa

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

Lyophilized from nanodisc solubilization buffer (20

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping Lyophilized proteins are shipped at ambient

temperature

Voltage-dependent calcium channels are composed of five subunits. The protein encoded by this gene represents one of these subunits, gamma, and is one of two known gamma subunit proteins. This particular gamma subunit is part of skeletal muscle 1,4-dihydropyridine-sensitive calcium channels and is an integral membrane

protein that plays a role in excitation-contraction coupling. This gene is part of a functionally diverse eight-member protein subfamily of the PMP-22/EMP/MP20 family and is located in a cluster with two family members that function as

transmembrane AMPÁ receptor regulatory proteins (TARPs).

Usage Research use only Conjugate Unconjugated

Background

ELISA assay to evaluate CACNG1-Nanodisc 0.2μg Human CACNG1-Nanodisc per well

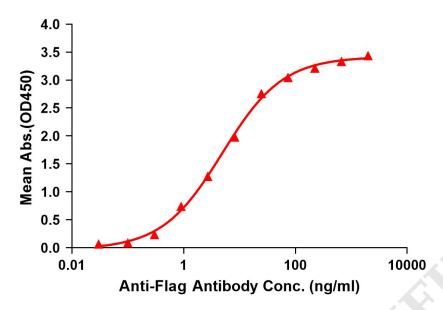

Figure 1. Elisa plates were pre-coated with Flag Tag CACNG1-Nanodisc ($0.2\mu g/per$ well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with CACNG1-Nanodisc is 4.936ng/ml.

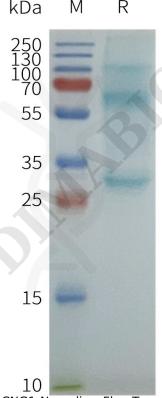

Figure 2. Human CACNG1-Nanodisc, Flag Tag on SDS-PAGE
