

## **PRODUCT INFORMATION**

**Target** CD11

**Synonyms** CD11A;LFA-1;LFA1A

Recombinant human CD11 protein with C-**Description** 

terminal human Fc tag **Delivery** Under development

**Uniprot ID** P20701 **Expression Host HEK293** 

Tag C-Human Fc Tag

Molecular

**Purity** 

**Background** 

**Usage** 

CD11 (Pro26-Leu1090) hFc(Glu99-ALA330) Characterization

The protein has a predicted molecular mass of **Molecular Weight** 142.67 kDa after removal of the signal peptide.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before

Formulation & lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

ITGAL encodes the integrin alpha L chain. Integrins are heterodimeric integral membrane proteins composed of an alpha chain and a beta chain. This I-domain containing alpha integrin chain. This i-domain containing alpha integrin combines with the beta 2 chain (ITGB2) to form the integrin lymphocyte function-associated antigen-1 (LFA-1), which is expressed on all leukocytes. LFA-1 plays a central role in leukocyte intercellular adhesion through interactions with its ligands, ICAMs 1-3 (intercellular adhesion molecules 1 through 3), and also functions in lymphocyte costimulatory signaling. Two

lymphocyte costimulatory signaling. Two transcript variants encoding different isoforms

have been found for this gene. [provided by
