| Tag                          | C-6×His Tag                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Molecular Characterization   | CDH6(Thr19-Ala615) 6×His tag                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Molecular Weight             | The protein has a predicted molecular mass of 67.2 kDa after removal of the signal peptide. The apparent molecular mass of CDH6-His is approximately 70-130 kDa due to glycosylation.                                                                                                                                                                                                                                                                              |
| Purity                       | The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue staining.                                                                                                                                                                                                                                                                                                                                                               |
| Formulation & Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.                                                                                                                                                                                                                                                                   |
| Storage & Shipping           | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.                                                                                                                                                                                                                |
| Background                   | This gene encodes a member of the cadherin superfamily. Cadherins are membrane glycoproteins that mediate homophilic cell-cell adhesion and play critical roles in cell differentiation and morphogenesis. The encoded protein is a type II cadherin and may play a role in kidney development as well as endometrium and placenta formation. Decreased expression of this gene may be associated with tumor growth and metastasis. [provided by RefSeq, May 2011] |
| Usage                        | Research use only                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Conjugate                    | Unconjugated                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

Figure 1. Human CDH6 Protein, His Tag on SDS-PAGE under reducing condition.

**Human CDH6, His Tagged protein ELISA**  
0.2 µg of Human CDH6, His tagged protein per well

Figure 2. ELISA plate pre-coated by 2 µg/mL (100 µL/well) Human CDH6 Protein, His Tag (PME101111) can bind Anti-CDH6(AMT-707 biosimilar) mAb (BME100234) in a linear range of 0.13-16 ng/mL.
