**Delivery** 

## **PRODUCT INFORMATION**

C-Flag Tag Tag **Target** CNGA1

CNCG, CNCG1, CNG-1, CNG1, RCNC1, RCNCa, **Synonyms** 

RCNCalpha, RP49

Human CNGA1 full length protein-synthetic **Description** 

nanodisc 6~8weeks

**Uniprot ID** P29973 **HEK293 Expression Host** 

**Protein Families** Ion Channels: Cyclic nucleotide gated

**Protein Pathways** 

The human full length CNGA1 protein has a MW of **Molecular Weight** 

79.6kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is involved in phototransduction. Along with another protein, the encoded protein forms a cGMP-gated cation channel in the plasma membrane, allowing depolarization of rod photoreceptors. This

represents the last step in the phototransduction **Background** pathway. Defects in this gene are a cause of

retinitis pigmentosa autosomal recessive (ARRP) disease. Multiple transcript variants have been found for this gene. [provided by RefSeq, Oct

**Usage** Research use only Conjugate Unconjugated
