

## **PRODUCT INFORMATION**

C-Flag&Strep Tag Tag

**Target** CXA8

**Synonyms** CAE, CAE1, CTRCT1, CX50, CZP1, MP70

Human CXA8-Strep full length protein-synthetic **Description** 

nanodisc **Delivery** 6~8weeks **Uniprot ID** P48165

**Expression Host HEK293 Protein Families** Ion Channels: Other

**Protein Pathways** N/A

The human full length CXA8-Strep protein has a **Molecular Weight** 

MW of 48.2 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a transmembrane connexin protein that is necessary for lens growth and maturation of lens fiber cells. The encoded protein is a component of gap junction channels and functions in a calcium and pH-dependent manner. Mutations in this gene have been associated with zonular pulverulent cataracts,

nuclear progressive cataracts, and cataractmicrocornea syndrome. [provided by RefSeq, Dec
