Description

PRODUCT INFORMATION

CXCL7 **Target**

Platelet Basic Protein; PBP; C-X-C Motif Chemokine

Synonyms

7;Leukocyte-Derived Growth
Factor;LDGF;Macrophage-Derived Growth
Factor;MDGFSmall-Inducible Cytokine
B7;PPBP;CTAP3;CXCL7;SCYB7;TGB1;THBGB1 Recombinant Human C-X-C Motif Chemokine 7 is

produced by our Mammalian expression system and the target gene encoding Ser35-Asp128 is expressed with a 6His tag at the C-terminus.

Delivery In Stock P02775 **Uniprot ID**

Expression Host HEK293

Tag C-6×His Tag

Molecular Characterization

Not available

Molecular Weight 11.3 KDa

Greater than 95% as determined by reducing **Purity**

SDS-PAGE.

Formulation & Reconstitution

Background

Storage & Shipping

Lyophilized from a 0.2 μm filtered solution of 20mM HAc-Nac, 150mM NaCl, pH 4.0.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature. Human Chemokine (C-X-C motif) Ligand 7 (CXCL7), also known as neutrophil activating peptide 2 (NAP-2), is a member of the CXC chemokines containing an ELR domain (Glu-Leu-Arg tripeptide motif). Similar to other ELR domain

Arg tripeptide motif). Similar to other ELR domain containing CXC chemokines, such as IL-8 and the GRO proteins, CXCL7 binds CXCR2, chemoattracts and activates neutrophils. CXCL7, Connective Tissue Activating Protein III (CTAPIII) and βthrombogulin (βTG), are proteolytically processed carboxylterminal fragments of platelet basic protein (PBP) which is found in the alphagrapules of human platelets. Although alphagranules of human platelets. Although CTAPIII, BTG, and PBP represent amino-terminal extended variants of NAP2 and possess the same CXC chemokine domains, these proteins do not exhibit CXCL7/NAP2 activity. CXCL7 induces cell migration through the G-protein-linked receptor
