Cat. No. FLP100230

PRODUCT INFORMATION

Tag C-Flag Tag

Target DRD2

Synonyms D2DR; D2R

DescriptionHuman DRD2 full length protein-synthetic

nanodisc In Stock

Delivery In Stock
Uniprot ID P14416
Expression Host HEK293

Protein Families Druggable Genome, GPCR, Transmembrane

Protein Pathways Gap junction, Neuroactive ligand-receptor

interaction

Molecular Weight

The human full length DRD2 protein has a MW of 50.6 kD2

50.6 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

This G-protein coupled receptor inhibits adenylyl cyclase activity. A missense mutation in this gene causes myoclonus dystonia; other mutations have been associated with schizophrenia. Alternative splicing of this gene results in two transcript variants encoding different isoforms. A third

variant has been described, but it has not been determined whether this form is normal or due to

aberrant splicing.

Usage Research use only **Conjugate** Unconjugated

Background

ELISA assay to evaluate DRD2-Nanodisc 0.2µg Human DRD2-Nanodisc per well

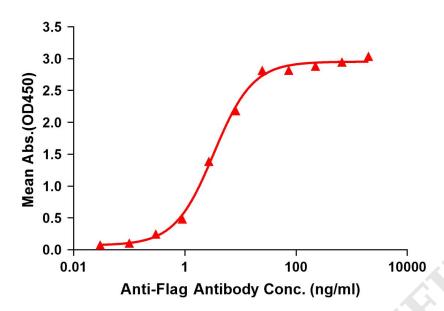

Figure 1. Elisa plates were pre-coated with Flag Tag DRD2-Nanodisc (0.2 μ g/per well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with DRD2-Nanodisc is 3.314ng/ml.

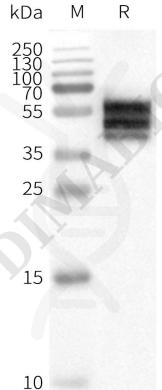

Figure 2. WB analysis of Human DRD2-Nanodisc with anti-Flag monoclonal antibody at 1/5000 dilution, followed by Goat Anti-Rabbit IgG HRP at 1/5000 dilution
