

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

Target FZD2

Expression Host

Background

Synonyms Fz2, OMOD2, fz-2, fzE2, hFz2

HEK293

Human FZD2-Strep full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** Q14332

Protein Families GPCR, Transmembrane, Druggable Genome,

Wnt NetPath 8,Wnt signaling,Wnt signaling and pluripotency,Cancer,Notch,Wnt Pathway,Stem **Protein Pathways**

Cell

The human full length FZD2-Strep protein has a **Molecular Weight**

MW of 63.6 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% Formulation & Reconstitution

 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

This intronless gene is a member of the frizzled gene family. Members of this family encode seven-transmembrane domain proteins that are receptors for the wingless type MMTV integration site family of signaling proteins. This gene encodes a protein that is coupled to the beta-

catenin canonical signaling pathway. Competition between the wingless-type MMTV integration site family, member 3A and wingless-type MMTV integration site family, member 5A gene products for binding of this protein is thought to regulate

> Email: info@dimabio.com Website: www.dimabio.com

the beta-catenin-dependent and -independent pathways. [provided by RefSeq, Dec 2010]

Usage Research use only

Unconjugated Conjugate
