

PRODUCT INFORMATION

Target GAST Synonyms GAS

Recombinant Human GAST with C-terminal **Description**

human Fc tag

Delivery In Stock **Uniprot ID** P01350 **Expression Host HEK293**

Tag C-Human Fc Tag

Molecular

Storage & Shipping

Background

GAST(Ser22-Phe92) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of 34.2 kDa after removal of the signal peptide. The apparent molecular mass of GAST-hFc is **Molecular Weight**

approximately 25-55 kDa due to glycosylation.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

Gastrin is a hormone whose main function is to stimulate secretion of hydrochloric acid by the gastric mucosa, which results in gastrin formation inhibition. This hormone also acts as a mitogenic

factor for gastrointestinal epithelial cells. Gastrin has two biologically active peptide forms, G34 and G17. [provided by RefSeq, Jul 2008]

Usage Research use only Conjugate Unconjugated
