

## **PRODUCT INFORMATION**

**Target** GPR37

PAELR; EDNRBL; hET(B)R-LP **Synonyms** 

Recombinant human GPR37 Protein with C-**Description** 

terminal 10×His tag

**Delivery** In Stock **Uniprot ID** 015354 **Expression Host HEK293** 

Tag C-10×His tag

Molecular

GPR37(Leu28-Tyr262) 10×His tag Characterization

The protein has a predicted molecular mass of **Molecular Weight** 26.2 kDa after removal of the signal peptide.

The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue

**Purity** 

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before

Formulation & lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

This gene is a member of the G protein-coupled receptor family. The encoded protein contains seven transmembrane domains and is found in cell and endoplasmic reticulum membranes. G protein-coupled receptors are involved in

**Background** 

translating outside signals into G protein mediated intracellular effects. This gene product interacts with Parkin and is involved in juvenile Parkinson disease. [provided by RefSeq, Oct

2012]

**Usage** Research use only

Conjugate Unconjugated
