

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

GPR88 **Target**

Synonyms COCPMR; STRG

Human GPR88-Strep full length protein-synthetic **Description**

nanodisc **Delivery** In Stock **Uniprot ID** Q9GZN0 **Expression Host HEK293**

Druggable Genome, GPCR, Transmembrane **Protein Families**

Protein Pathways N/A

Storage & Shipping

Background

The human full length GPR88-Strep protein has a **Molecular Weight**

MW of 40.2 kDa

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution for specific instructions. Do not use solvents with

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in

lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized from nanodisc solubilization buffer (20

Lyophilized proteins are shipped at ambient

temperature.

The protein is a G protein-coupled receptor found almost exclusively in the striatum, a brain structure that controls motor function and cognition. Defects in this gene have been associated with chorea, speech delay, and

learning difficulties, as well as some

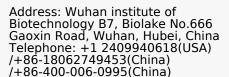

neuropsychiatric disorders.

Usage Research use only

Conjugate Unconjugated

ELISA assay to evaluate GPR88-Strep-Nanodisc 0.2µg Human GPR88-Strep-Nanodisc per well

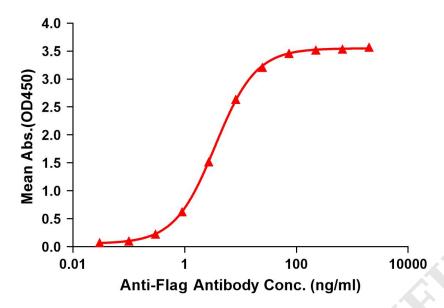

Figure 1. Elisa plates were pre-coated with C-Flag&Strep Tag GPR88-Strep-Nanodisc (0.2 μ g/per well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with GPR88-Strep-nanodisc is 3.524ng/ml.
