

PRODUCT INFORMATION

IFNAR1 **Target**

Synonyms AVP;IFN-alpha-REC;IFNAR;IFNBR;IFRC

Recombinant Human IFNAR1 Protein with C-**Description**

terminal 6×His tag

Delivery In Stock **Uniprot ID** P17181 **HEK293 Expression Host**

Tag C-6×His Tag

Molecular Characterization

Background

IFNAR1(Lys28-Lys436) 6×His Tag

The protein has a predicted molecular mass of **Molecular Weight**

48.0 kDa after removal of the signal peptide. The apparent molecular mass of IFNAR1-His is

approximately 70-100 kDa due to glycosylation. The purity of the protein is greater than 90% as determined by SDS-PAGE and Coomassie blue

Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

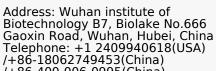

The protein encoded by this gene is a type I membrane protein that forms one of the two chains of a receptor for interferons alpha and beta. Binding and activation of the receptor stimulates Janus protein kinases, which in turn phosphorylate several proteins, including STAT1 and STAT2. The protein belongs to the type II

cytokine receptor family and functions as an antiviral factor. [provided by RefSeq, Jul 2020]
