

## **PRODUCT INFORMATION**

IL-29 **Target** 

Interferon lambda-1;IFN-lambda-1;Cytokine Zcyto21;Interleukin-29;IL-29;IFNL1;IL29;ZCYTO21 **Synonyms** 

Recombinant Human Interferon Lambda-1 is

produced by our Mammalian expression system and the target gene encoding Gly20-Thr200 is **Description** 

expressed with a 10His tag at the C-terminus.

**Delivery** Under development

**Uniprot ID** Q8IU54 **Expression Host HEK293** 

Tag C-10×His Tag

Molecular Characterization

Not available

**Molecular Weight** 21.4 KDa

The purity of the protein is greater than 95% as Purity

determined by SDS-PAGE and Coomassie blue

Formulation & Reconstitution

**Background** 

Lyophilized from a 0.2 µm filtered solution of PBS,

pH 7.4.

lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Store at -20°C to -80°C for 12 months in

Lyophilized proteins are shipped at ambient

temperature

Interleukin-29 (IL-29) is a secreted protein which belongs to the IL-28/IL-29 family. IL-29 is a cytokine with immunomodulatory activity. IL-29 is highly similar in amino acid sequence to the IL-28. IL-28 and IL-29 are induced by viral infection and showed antiviral activity. IL-28 and IL-29 interacted with a heterodimeric class II cytokine receptor that consisted of IL-10 receptor beta (IL-10R beta) and an orphan class II receptor chain, designated IL-28R alpha. IL-29 plays an

important role in host defenses against microbes and its gene is highly upregulated in cells infected with viruses. IL-29 may play a role in antiviral immunity. IL-29 up-regulates MHC class I antigen expression. It is a Ligand for the heterodimeric class II cytokine receptor composed of IL10RB and IL28RA. The ligand/receptor complex seems
