

PRODUCT INFORMATION

|                              |  |
|------------------------------|--|
| Target                       | LPAR5  |
| Synonyms                     | LPA5, GPR92, GPR93, KPG_010  |
| Description                  | Recombinant human LPAR5 Protein with C-terminal human Fc tag   |
| Delivery                     | In Stock   |
| Uniprot ID                   | Q9H1C0   |
| Expression Host              | HEK293   |
| Tag                          | C-Human Fc tag   |
| Molecular Characterization   | LPAR5(Met1-His25) hFc(Glu99-Ala330)  |
| Molecular Weight             | The protein has a predicted molecular mass of 28.9 kDa after removal of the signal peptide.  |
| Purity                       | The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.   |
| Formulation & Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.   |
| Storage&Shipping             | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.  |
| Background                   | This gene encodes a member of the rhodopsin class of G protein-coupled transmembrane receptors. This protein transmits extracellular signals from lysophosphatidic acid to cells through heterotrimeric G proteins and mediates numerous cellular processes. Many G protein receptors serve as targets for pharmaceutical drugs. Transcript variants of this gene have been described.[provided by RefSeq, Dec 2008] |
| Usage                        | Research use only  |
| Conjugate                    | Unconjugated   |
