

## **PRODUCT INFORMATION**

**Target** LRRC4

**Synonyms** NAG14; NGL-2

Recombinant human LRRC4 Protein with C-**Description** 

terminal 6×His tag

**Delivery** In Stock **Uniprot ID** Q9HBW1 **Expression Host HEK293** 

Tag C-6×His tag

Molecular Characterization

**Purity** 

**Background** 

LRRC4(Ala39-Lys527) 6×His tag

The protein has a predicted molecular mass of **Molecular Weight** 55.6 kDa after removal of the signal peptide.

The purity of the protein is greater than 80% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before Formulation &

lyophilization. Please see Certificate of Analysis Reconstitution for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

Predicted to be involved in modulation of chemical synaptic transmission and synapse organization. Predicted to act upstream of or within synapse organization. Predicted to be located in dendritic spine; excitatory synapse;

and postsynaptic membrane. Predicted to be active in glutamatergic synapse and postsynaptic density membrane. [provided by Alliance of

Genome Resources, Jun 2025]

Usage Research use only

Conjugate Unconjugated
