

PRODUCT INFORMATION

C-Flag Tag Tag

MLC1 **Target**

Synonyms LVM; MLC; VL

Human MLC1 full length protein-synthetic **Description**

nanodisc **Delivery** In Stock **Uniprot ID** Q15049 **Expression Host HEK293**

Protein Families Ion Channels: Other, Transmembrane

Protein Pathways N/A

Background

The human full length MLC1 protein has a MW of **Molecular Weight**

41.2 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

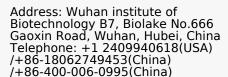

The function of this protein is unknown; however, homology to other proteins suggests that it may be an integral membrane transporter. Mutations

in this gene have been associated with megalencephalic leukoencephalopathy with subcortical cysts, an autosomal recessive neurological disorder. Alternatively spliced transcript variants encoding different isoforms

have been identified.

Usage Research use only Conjugate Unconjugated

ELISA assay to evaluate MLC1-Nanodisc 0.2µg Human MLC1-Nanodisc per well

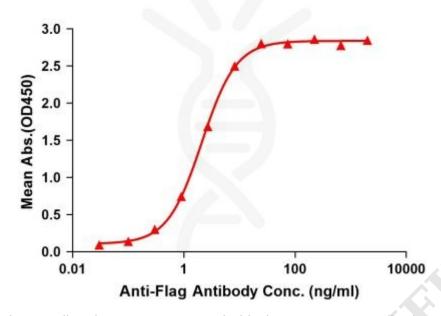

Figure 1. Elisa plates were pre-coated with Flag Tag MLC1-Nanodisc (0.2 μ g/per well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with MLC1-Nanodisc is 2.111ng/ml.
