

PRODUCT INFORMATION

NRP2 **Target**

NP2;NPN2;PRO2714;VEGF165R2 **Synonyms**

Recombinant Human NRP2 Protein with C-**Description**

terminal 6×His tag

Delivery In Stock **Uniprot ID** 060462 **Expression Host HEK293** Tag C-6×His Tag

Molecular

NRP2(Arg21-Pro864) 6×His tag Characterization

The protein has a predicted molecular mass of

95.9 kDa after removal of the signal peptide. The apparent molecular mass of NRP2-His is **Molecular Weight**

approximately 100-130 kDa due to glycosylation. The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue

Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a member of the neuropilin family of receptor proteins. The encoded

transmembrane protein binds to SEMA3C protein {sema domain, immunoglobulin domain (lg),

Background

short basic domain, secreted, (semaphorin) 3C} and SEMA3F protein {sema domain, immunoglobulin domain (Ig), short basic domain, immunoglobulin domain (Ig), short basic domain, secreted, (semaphorin) 3F}, and interacts with vascular endothelia growth factor (VEGF). This

protein may play a role in cardiovascular development, axon guidance, and tumorigenesis. Multiple transcript variants encoding distinct isoforms have been identified for this gene.
