

## **PRODUCT INFORMATION**

C-Flag&Strep Tag Tag

**Target** OR2J2

OR6-19, OR6-8, OR6.3.8, ORL684, dJ80I19.4, **Synonyms** 

hs6M1-6

Human OR2J2-Strep full length protein-synthetic Description

nanodisc 6~8weeks

**Delivery Uniprot ID** 076002 HFK293 **Expression Host** 

**Protein Families** Transmembrane, Druggable Genome, **Protein Pathways** GPCRDB Class A Rhodopsin-like,

The human full length OR2J2-Strep protein has a **Molecular Weight** 

MW of 35.2 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% Formulation & - 8% trehalose is added as protectants before Reconstitution lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and

hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor

genes and proteins for this organism is
