

## **PRODUCT INFORMATION**

Тад	C-Flag&Strep Tag
Target	OR52D1
Synonyms	OR11-43
Description	Human OR52D1-Strep full length protein- synthetic nanodisc
Delivery	6~8weeks
Uniprot ID	Q9H346
<b>Expression Host</b>	HEK293
<b>Protein Families</b>	Transmembrane
Protein Pathways	Olfactory transduction
Molecular Weight	The human full length OR52D1-Strep protein has a MW of 35.1 kDa
Formulation & Reconstitution Storage & Shipping	Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).
Background	Lyophilized proteins are shipped at ambient temperature. Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms.
Usage	Research use only
Conjugate	Unconjugated
