

PRODUCT INFORMATION

Target PROKR2

HH3; KAL3; PKR2; GPRg2; GPR73b; GPR73L1; **Synonyms**

dJ680N4.3

Recombinant human PROKR2 Protein with C-**Description**

terminal human Fc tag

Delivery In Stock **Uniprot ID** Q8NFJ6 **Expression Host HEK293**

Tag C-Human Fc tag

Molecular

Purity

Background

PROKR2(Met1-Lys53) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of **Molecular Weight** 32.1 kDa after removal of the signal peptide.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before Reconstitution lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

Prokineticins are secreted proteins that can promote angiogenesis and induce strong gastrointestinal smooth muscle contraction. The

protein encoded by this gene is an integral membrane protein and G protein-coupled receptor for prokineticins. The encoded protein is similar in sequence to GPR73, another G protein-coupled receptor for prokineticins. [provided by Poffor Jul 2008]
