

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

PTGDR2 **Target**

Synonyms CD294; CRTH2; DL1R; DP2; GPR44

Human PTGDR2-Strep full length protein-**Description**

synthetic nanodisc

Delivery 6~8weeks **Uniprot ID** Q9Y5Y4 **Expression Host HEK293**

Protein Families Druggable Genome, GPCR, Transmembrane

Protein Pathways

Background

The human full length PTGDR2-Strep protein has **Molecular Weight**

a MW of 43.3 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not Storage & Shipping

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

The protein is a G-protein-coupled receptor that is preferentially expressed in CD4 effector T helper 2 (Th2) cells. This protein is a prostaglandin D2 receptor that mediates the pro-inflammatory chemotaxis of eosinophils, basophils, and Th2 lymphocytes generated during allergic inflammation. Single nucleotide polymorphisms in

the 3' UTR of this gene have been associated with
