

PRODUCT INFORMATION

C-Flag Tag Tag SLC2A4 **Target** GLUT4 **Synonyms**

Human SLC2A4 full length protein-synthetic **Description**

nanodisc **Delivery** 3-4 weeks **Uniprot ID** P14672 **Expression Host HEK293**

Protein Families Druggable Genome, Transmembrane

Adipocytokine signaling pathway, Insulin signaling pathway, Type II diabetes mellitus **Protein Pathways**

The human full length SLC2A4 protein has a MW **Molecular Weight**

of 54.6 kDa

Formulation & Reconstitution

Background

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature. This gene is a member of the solute carrier family

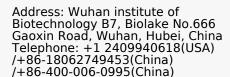

2 (facilitated glucose transporter) family and encodes a protein that functions as an insulinregulated facilitative glucose transporter. In the absence of insulin, this integral membrane protein is sequestered within the cells of muscle and adipose tissue. Within minutes of insulin stimulation, the protein moves to the cell surface

and begins to transport glucose across the cell membrane. Mutations in this gene have been associated with noninsulin-dependent diabetes mellitus (NIDDM). [provided by RefSeq, Jul 2008]

Usage Research use only

Conjugate Unconjugated

ELISA assay to evaluate SLC2A4-Nanodisc 0.2μg Human SLC2A4-Nanodisc per well

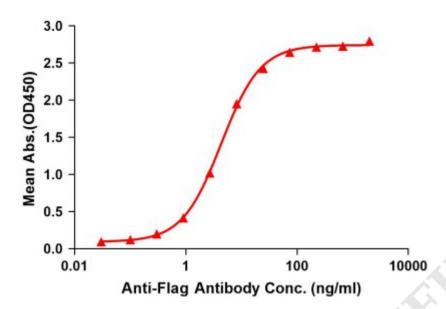

Figure 1. Elisa plates were pre-coated with Flag Tag SLC2A4-Nanodisc ($0.2\mu g/per$ well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with SLC2A4-Nanodisc is 4.357ng/ml.
