

PRODUCT INFORMATION

|                              |   |
|------------------------------|---|
| Tag                          | C-Flag Tag  |
| Target                       | TAAR9   |
| Synonyms                     | TA3, TAR3, TAR9, TRAR3  |
| Description                  | Human TAAR9 full length protein-synthetic nanodisc  |
| Delivery                     | 6~8weeks  |
| Uniprot ID                   | Q96RI9  |
| Expression Host              | HEK293  |
| Protein Families             | Druggable Genome,   |
| Protein Pathways             | N/A   |
| Molecular Weight             | The human full length TAAR9 protein has a MW of 39kDa   |
| Formulation & Reconstitution | Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.    |
| Storage & Shipping           | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature. |
| Background                   | TAAR9 is a member of a large family of rhodopsin G protein-coupled receptors (GPCRs, or GPRs). GPCRs contain 7 transmembrane domains and transduce extracellular signals through heterotrimeric G proteins.[supplied by OMIM, Jul 2005]             |
| Usage                        | Research use only   |
| Conjugate                    | Unconjugated  |
