

PRODUCT INFORMATION

TGFA Target

Synonyms TGF-alpha; ETGF; TGF type 1

Recombinant Human TGFA Protein with C-**Description**

terminal human Fc tag

Delivery In Stock **Uniprot ID** P01135 **Expression Host HEK293**

Tag C-Human Fc Tag

Molecular

TGFA(Glu24-Gln98) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of

34.1 kDa after removal of the signal peptide. The apparent molecular mass of TGFA-hFc is **Molecular Weight**

approximately 35-55 kDa due to glycosylation.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a growth factor that is a ligand for the epidermal growth factor receptor, which

activates a signaling pathway for cell

proliferation, differentiation and development. This protein may act as either a transmembrane-bound ligand or a soluble ligand. This gene has been associated with many types of cancers, and **Background**

it may also be involved in some cases of cleft lip/palate. Alternatively spliced transcript variants encoding different isoforms have been found for

> Email: info@dimabio.com Website: www.dimabio.com

this gene. [provided by RefSeq, Sep 2011]

Usage Research use only

Unconjugated Conjugate
