Cat. No. PME101724

## **PRODUCT INFORMATION**

**Target** TNFSF15

**Synonyms** TL1; TL1A; VEGI; TNLG1B; VEGI192A

Recombinant human TNFSF15 MTQ Protein with Description

N-terminal 10×His tag

**Delivery** In Stock **Uniprot ID** 095150 **Expression Host HEK293** 

Tag N-10×His tag

Molecular Characterization

**Purity** 

10×His tag MTQ TNFSF15(Leu72-Leu251)

The protein has a predicted molecular mass of **Molecular Weight** 26.5 kDa after removal of the signal peptide.

The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before Formulation & lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is a cytokine that belongs to the tumor necrosis factor (TNF) ligand family. This protein is abundantly expressed in endothelial cells, but is not

expressed in either B or T cells. The expression of this protein is inducible by TNF and IL-1 alpha. This cytokine is a ligand for receptor TNFRSF25 and decoy receptor TNFRSF21/DR6. It can activate NF-kappaB and MAP kinases, and acts as

**Background** 

an autocrine factor to induce apoptosis in endothelial cells. This cytokine is also found to inhibit endothelial cell proliferation, and thus may function as an angiogenesis inhibitor. Two transcript variants encoding different isoforms have been found for this gene. [provided by
