

## **PRODUCT INFORMATION**

IL11RA **Target** 

**Synonyms** NR1;GP130;ll11ra1;ll-11ra;ll11ra2

Recombinant mouse IL11RA protein with C-Description

terminal 6×His tag

**Delivery** In Stock **Uniprot ID** Q64385 **Expression Host HEK293** Tag C-6×His Tag

Molecular

Purity

**Background** 

Mouse IL11RA(Cys26-Gln367) 6×His tag Characterization

The protein has a predicted molecular mass of

38.3 kDa after removal of the signal peptide. The **Molecular Weight** apparent molecular mass of mIL11RA-His is approximately 35-55 kDa due to glycosylation.

The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

Enables interleukin-11 binding activity and interleukin-11 receptor activity. Acts upstream of or within several processes, including cytokinemediated signaling pathway; decidualization; and natural killer cell differentiation. Predicted to be located in extracellular region and membrane.
Predicted to be integral component of membrane.

Predicted to be part of receptor complex.

Predicted to be active in external side of plasma membrane. Is expressed in several structures, including alimentary system; cranial suture; genitourinary system; immune system; and musculature. Orthologous to human IL11RA (interleukin 11 receptor subunit alpha). [provided by Alliance of Genome Resources, Apr 2022]

Usage Research use only Conjugate Unconjugated
