

PRODUCT INFORMATION

Clone ID DM192 **Target** ADAM9

CORD9; MCMP; MDC9; Mltng **Synonyms**

Host Species Rabbit

PE-conjugated Anti-ADAM9 antibody(DM192); Description

Rabbit mAb

Delivery Under Development

Uniprot ID Q13443 Rabbit IgG IgG type Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended Flow Cyt 1:100 **Dilutions**

Formulation &

DIMA Disclaimer

Purified from cell culture supernatant by affinity **Purification**

chromatography

Liquid PBS with 0.05% Proclin300, 1% BSA Reconstitution

Storage & Shipping Store at 2°C-8°C for 6 months

This gene encodes a member of the ADAM (a disintegrin and metalloprotease domain) family Members of this family are membrane-anchored proteins structurally related to snake venom disintegrins; and have been implicated in a variety of biological processes involving cell-cell

and cell-matrix interactions; including fertilization; muscle development; and

Background neurogenesis. The protein encoded by this gene interacts with SH3 domain-containing proteins;

binds mitotic arrest deficient 2 beta protein; and is also involved in TPA-induced ectodomain shedding of membrane-anchored heparin-binding EGF-like growth factor. Several alternatively spliced transcript variants have been identified

for this gene.

Usage Research use only

Conjugate PE-conjugated

All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are
