Cat. No. DMC100425P

PRODUCT INFORMATION

Clone ID DMC425 **CD63 Target**

> CD63 antigen; Granulophysin; LAMP-3; Limp1; Melanomaassociated antigen ME491;OMA81H;Ocular melanoma-

associated antigen; Tetraspanin-30; Tspan-30

Host Species

PE-conjugated Anti-CD63 antibody(DMC425); IgG1 Chimeric **Description**

mAb

Delivery Under Development

P08962 **Uniprot ID**

IgG type Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended

Formulation &

Background

DIMA Disclaimer

Synonyms

Flow Cyt 1:100 Dilutions

Purified from cell culture supernatant by affinity **Purification**

chromatography

Reconstitution

Storage & Shipping Store at 2°C-8°C for 6 months

The protein encoded by this gene is a member of the transmembrane 4 superfamily; also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell

development; activation; growth and motility. The encoded protein is a cell surface glycoprotein that is known to complex with integrins. It may function as a blood platelet activation marker. Deficiency of this protein is associated with Hermansky-Pudlak syndrome. Also this gene has been associated with tumor progression. Alternative splicing

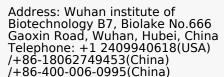

results in multiple transcript variants encoding different protein isoforms.

Research use only

Usage Conjugate PE-conjugated

All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is

prohibited. We are actively scrutinizing all patent application to ensure no IP infringement.
