Cat. No. BME100210P

PRODUCT INFORMATION

Uniprot ID N/A

Common Name Hen egg Lysozyme

Conjugate PE-conjugated

HEL **Synonyms**

Applications Flow Cyt

Recommended

Flow Cyt 1:100 **Dilutions**

Formulation & Reconstitution

Delivery

Background

Liquid
☐PBS with 0.05% Proclin300, 1% BSA

Host Species Chimeric IgG type lgG1 Reactivity N/A **Target** HEL

PE-conjugated Anti-HEL Human IgG1-Kappa **Description**

Isotypé control mAb Under Development

Storage & Shipping Store at 2°C-8°C for 6 months

Anti Chicken Hen Egg Lysozyme, specifically recognises Hen Egg Lysozyme (HEL), known also as muramidase or N-acetylmuramide glycanhydrolase, a 14kDa enzymic protein involved in the destruction of hastoria. involved in the destruction of bacteria. Lysozyme damages bacterial cell walls by catalyzing hydrolysis of 1,4-beta-linkages between N-

acetylmuramic acid and N-acetyl-D-glucosamine residues in a peptidoglycan and between Nacetyl-D-glucosamine residues in chitodextrins. Lysozyme is abundant in a number of secretions, such as tears, saliva, human milk and mucus. It is

also present in cytoplasmic granules of PMN's and high concentrations of lysozyme are present in egg white. C-type lysozymes are closely related to alpha-lactalbumin in sequence and structure

making them part of the same family.

Usage Research use only
